

We Welcome Work

We Welcome Work

Online apprenticeship simulator for introducing work strategies to teachers, students and companies

The We Welcome Work

project meets the growing needs of high school students/young people who live in a very mobile environment, where time, education and employment are challenging issues. The main aim of our partnership is to offer non-formal opportunities for young people to acquire employability, entrepreneurship and digital skills to support their transition from school to the world of work thus achieving a better skills match and career orientation.

Don't expect success.
Prepare for it.
